EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

- 2. Authorization for this examiner's amendment was given in a telephone interview with Paul Heltko (Reg. # 51,806) and Frank C. Nicholas (Reg. # 33,983) on 7/20/2006.
- 3. The application has been amended as follows:

In the Claims

Please AMEND claims 1,13,19, 23 in accordance with the following:

1). (Currently Amended) A method for communicating among a plurality of peer nodes in a network environment, comprising:

communicating a discovery command from a current peer node to at least one neighbor peer node, the neighbor peer node in communication with the current peer node, the discovery command including time to live value indicative of the number of times that the discovery command is forwarded prior to communication expiration; and

receiving, at the current peer node, an aggregated list of peer nodes, the aggregated list of peer nodes comprising information about concerning at least one peer node in communication with the at least one neighbor node, the information including an IP address and a port number on which each peer node can accept incoming connections, and wherein each node waits for a predetermined ping time out delay between communicating a subsequent discovery command; and

receiving, at the current peer node, a second discovery command from an originating peer node; and

communicating, from the current peer node directly to the originating peer node, the peer table in response to the second discovery command.

13). (Currently Amended) A Computer computer program product in a recordable type computer usable medium for communicating among a plurality of peer nodes in a network environment, comprising:

means for communicating a discovery command from a current peer node to at least one neighbor peer node, the neighbor peer node in communication with the current peer node, the discovery command including time to live value indicative of the number of times that the discovery command is forwarded prior to communication expiration; and

means for receiving, at the current peer node, an aggregated list of peer nodes, the aggregated list of peer nodes comprising information about concerning at least one peer node in communication with the at least one neighbor node, the information including an IP address and a port number on which each peer node can accept incoming connections, and wherein each node waits for a predetermined ping time out delay between communicating a subsequent discovery command; and means for receiving, at the current peer node, a second discovery command from an originating peer node; and means for communicating, from the current peer node directly to the originating peer node, the peer table in response to the second discovery command.

19). (Currently Amended) The product of claim 13, further comprising: means for communicating forwarding a query command for the current peer node to a predetermined number of neighbor peer nodes.

23). (Currently Amended) A system for communicating among a plurality of peer nodes in a network environment, comprising:

means for communicating a discovery command from a current peer node to at least one neighbor peer node, the neighbor peer node in communication with the current peer node, the discovery command including time to live value indicative of the number of times that the discovery command is forwarded prior to communication expiration; and

means for receiving, at the current peer node, an aggregated list of peer nodes, the aggregated list of peer nodes comprising information about concerning at least one peer node in communication with the at least one neighbor node, the information including an IP address and a port number on which each peer node can accept incoming connections, and wherein each node waits for a predetermined ping time out delay between communicating a subsequent discovery command; and

means for receiving, at the current peer node, a second discovery command from an originating peer node; and

means for communicating, from the current peer node directly to the originating peer node, the peer table in response to the second discovery command.

21,22,23,24,25,27,28,29,30,31,32 respectively are allowed which are renumbered as 1,2,3,4,5,6,7,8,9,10,11,12,13,14,15,16,17,18,19,20, 21,22,23,24,25,26,27,28,29 respectively. Original Claims 5,16,26 are cancelled.

5. This communication warrants no examiner's reason for allowance, as applicant's reply makes evident the reason for allowance, satisfying the record as whole as required by rule 37 CFR 1.104 (e). In this case, the substance of applicant's remarks filed on January 4,2006 with respect to the amended claim limitations point out the reason claims are patentable over the prior art of record. Thus, the reason for allowance is in all probability evident from the record and no statement for examiner's reason for allowance is necessary (see MPEP 13202.14).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dhairya A. Patel whose telephone number is 571-272-5809. The examiner can normally be reached on Monday-Friday 7:00AM-4: 30PM, first Fridays OFF.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zarni Maung can be reached on 571-272-3939. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
